Facilitating Happiness

While the "Introduction to happiness" course focuses on more theory than practice, the focus of this second course is almost entirely on practice—on application. Each of the lectures below highlights a series of evidence-based techniques that can significantly shift the needle in terms of your own and others' happiness. Over a period of 22 weeks—which will include lectures and webinars—I will introduce you to the science behind each technique and then provide you with concrete steps that you can take to make a meaningful difference in your life.

Lecture 1: The Nature of Change

The first module explores the neuroscience of transformation and introduces a model for the attainment of lasting change.

- 1.1 What is the objective of this course? What are the benefits of experimentation? What is the difference between information and transformation?
- 1.2 What is neuroplasticity and why is it important? Would you rather be a taxi driver in New York City or London? What is the connection between neural pathways and rivers? What is the key to bringing about positive change?
- 1.3 What ideas about change do Peter Senge and Daniel Goleman share? Who are the NCs, TCs, and LCs? What is the Honeymoon Effect?
- 1.4 How do willpower and waypower work together? What are the components of a successful change process? Why is hard work not enough for meaningful transformation?
